SUMMARY

Full Stack Developer specializing in the MERN stack with experience building and deploying production-ready applications. Skilled in React, Next.js, Node.js, Express.js, MongoDB, Redis, Docker, GitHub Actions and CI/CD. Experienced in developing scalable REST APIs, integrating AI services, implementing secure authentication and automating deployments.

PROJECTS

AI Code Reviewer | React, Node.js, Express.js, MongoDB, Gemini API, JWT, Docker, GitHub Actions | Render, Vercel | [GitHub](#) | [Live](#)

- Built an AI-powered code review platform that analyzes source code through direct input, file uploads, and GitHub repository links using the Gemini API.
- Developed secure RESTful APIs with JWT authentication, file validation, and persistent review history to ensure secure and reliable code analysis.
- Implemented AI-generated code reviews, debugging suggestions, and code improvement recommendations with support for exporting reports in PDF and JSON formats.
- Containerized the application using multi-stage Docker builds and Docker Compose for consistent development and deployment.
- Implemented secure file upload handling and validation for reviewing source code files efficiently
- Built a production-grade CI/CD pipeline with GitHub Actions to automate testing, Docker image publishing to Docker Hub, and zero-touch deployments to Render and Vercel.

Chat Application | React, Node.js, Express.js, MongoDB, Socket.IO | Render | [GitHub](#) | [Live](#)

- Built a real-time chat application using React, Node.js, Express, MongoDB and Socket.IO for instant messaging functionality
- Implemented user authentication and session-based authorization using Passport.js and Express sessions
- Designed and developed RESTful APIs for user management, chat handling and message operations
- Focused on secure backend practices including protected routes, secure cookies, error handling and session management
- Developed a responsive and interactive user interface while maintaining clean frontend-backend architecture and scalable code structure

Twitter Clone | React, Node.js, Express.js, MongoDB | [GitHub](#)

- Full-stack social media application with user authentication and authorization
- Implemented core features such as post creation and user feeds
- Built REST APIs using Node.js and Express and managed data with MongoDB
- Integrated frontend with backend APIs using React and async/await

SKILLS

- **Languages:** JavaScript, Java
- **Frontend:** React, Next.js, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL, Redis
- **DevOps:** Docker, Docker Compose, GitHub Actions, CI/CD
- **Tools & Platforms:** Git, GitHub, Postman, Vercel, Render
- **Concepts:** REST APIs, JWT Authentication, Git Workflow, Responsive Design, WebSockets

ACHIEVEMENTS

- **Smart India Hackathon (College-Level Prelims):** Selected at the college-level preliminary round; worked in a team to analyze a real-world problem and propose a technical solution for the FRA (Forest Rights Act) community.
- **Innov8 Hackathon (College-Level):** Participated in a team-based hackathon focused on problem-solving, idea development, and rapid prototyping within limited time constraints.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering

JECRC University, Jaipur
